

## Master of Science in Nursing (MSN) Program Achievement Data

### Certification Examination Pass Rate

First-time Performance on Certification Examination Aggregated for Entire Program (Family Nurse Practitioner)				
Expected Level of Achievement	Year	Certification Examination Pass Rate		
The ELA for all first-time test takers will be at or above the national mean (for the same 3-year period) during the same 12-month period. This data will be obtained annually from ANCC and AANP in the Spring of each year which contains data from the preceding year. The current national mean for the AANP examination from the 2017-2019 data is 84% and the ANCC is 85%. This national mean will change prior to our 2021 graduates testing and it is understood that the 3-year national mean will be calculated based on the 2018-2020 data.	2019	Data collection and analysis will commence in Early Spring 2022 with the first available reports after graduation of the first cohort. Will be aggregated annually and disaggregated by graduating cohort-date of program completion.
